

Save Energy. Save Money.

iNet
ALWAYS CONNECTED

Use the **iNet** Energy Package
and save up to
20%*
on monthly utility bills.

iNet Energy Management allows you to reduce energy usage while maintaining personal comfort for your home or business. Each of your thermostats can easily customize to fit your needs—whether you're keeping a comfortable temperature or looking for ways to save energy. **iNet** Energy uses triggers like time of day, day of week and status of the security system to make your property run more efficiently.

Control the temperature from your mobile phone or the Internet!

iNet gives you anytime, anywhere access to your thermostats through web and mobile devices, and real-time alerts when a thermostat setting changes. You can easily control all of your thermostat settings through user-friendly website and mobile apps, eliminating the need for confusing instruction manuals while saving you energy and money.

iNet powered by **Security Networks**, is the best in class interactive energy management and security system service.

Unlike most security systems, **iNet** is 100% wireless. If the line is cut or there is a power outage, **iNet** is always connected.

*User-friendly mobile apps for
iPhone, Blackberry & Android*

*Remote system control from any
Internet-enabled device or computer*

Secure wireless signaling

*Monitor and change thermostat
settings from anywhere*

*Set-up energy efficient
